Fishers nix DENR opening coastal areas to investors

By Mancho S. Rivera

MANILA—FISHERIES AND ENVIRONMENTALISTS vociferously expressed fears that a new order from the Department of Environment and Natural Resources allowing the 25-year lease of idle coastal areas throughout the country to big investors could displace small fisherman.

FVR sticks to ultimatum

JDV behind 'no-election' provision, critics say

By Michael Lim-Uson

ADMINISTRATION AND OPPOSITION members of the House of Representatives yesterday pointed to Speaker Jose De Venecia as the brain behind the proposed to scrap the 2007 elections (No-02).

Negros Oriental Rep. Justino "Jing" Pardo, Albayeta party leader, told the speaker and a Labor lawmaker who asked to maintain a compromise to hold the 2007 elections that De Venecia had a hand in the Malabon-based Congress's Commission's call for the scrapping of next year's polls to pave the way for a constitutional amendment in 2013.

De Venecia phoned the lawmakers last night to deny the accusation. "The No-02 proposal is clearly a social issue for congressmen, senators, governors, mayors and councilors whose term will be extended up to 2014," he said. "There's a major conflict of interest. We can't solve [the] high moral ground with moral issues hanging," the Speaker said, stressing that he and President Macapagal-Arroyo had nothing to do with it.

He noted that the No-02 was "approved overwhelmingly" by the Congress members, with only two or three members going against the majority decision.

A lawmaker belonging to Lukas claimed that De Venecia called up several members of Congress "and prevailed upon them to insert the No-02 provision."

Says no deal made for GMA to stay until 2010

By Cynthia D. Balana
and Tereza Gregis
PDI General Correspondent

THEY COULD NOT EVEN AGREE on what they agreed on. If any.

Former President Fidel Ramos yesterday stood firm on his position that President Macapagal-Arroyo should cut her term by 2007, disputing claims that a formula had been struck allowing her to stay on until 2010 but with clipped powers.

Ramos sent out this message through his media office, Ed Maling, to correct "misinformation" about what transpired during his dinner meeting with the Arroyo at her Forbes Park residence on Wednesday night.

However in Ramos' own Lakas-CMD party and in Malabon-based previously said Ms Arroyo had agreed on a "retirement" formula under which she would hang on to the presidency while diminished powers until 2010. A statement sent to the Inquirer by Maly said Ramos "denied all claims that appeared in the media, stressing that many of those were misstatements."

Maly said this was Ramos' reply to inquiries about what he and the Arroyo had discussed.

The statement said Ramos was sticking to his position for the country to shift from a presidential to parliamentary form of government by June 2007.

This means that President Arroyo has to...

Arrest order out but GIs' custody in doubt

By Tereza Gregis
and Nestor E. Burgos Jr.
PDI General Correspondent

OLONGAPO CITY—AN ARREST warrant was issued yesterday morning for the four US Marines charged with the Nov. 3 rape of a Filipino woman at the Subic Bay Freeport. But their custody remained in doubt.

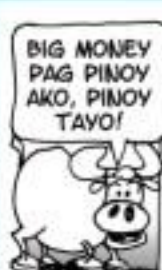

While Judge Rosendo Dela Cruz of the Olongapo Regional Trial Court ordered the immediate arrest of Staff Sgt. Chad Brian Carpenter and Lance Corporal

Daniel Smith, Keith Williams and Dominic Dwyer, he said their Filipino driver, Timothy Soriano Jr., was "free as a bird."

Dela Cruz said he found "no probable cause" to infer as a co-conspirator the 32-year-old driver of the van where the alleged rape occurred.

Referring to earlier statements, Justice Secretary Rodolfo C. Dela Cruz said the warrant issued by Dela Cruz was no guarantee that the Philippines would immediately have custody of the accused.

2 alien 'bouse mates' want to become Pinoys

By Lella B. Salaverria

THESE ALIENS WANT TO BECOME Pinoys.

Reality show contestants from Italy and China want to be recognized as Filipino citizens, claiming that one of their parents is Filipino, according to Immigration Commissioner Nipito Fernandez Jr.

Pinoys Big Brother had nothing to do with it, but the 14 did. The Italian contestant from Italy and China, respectively, are also working without permits in the country. The two were also granted special work permits, so they

could now pursue legal show business ventures.

But if Milby and Ruman were recognized as locals, they would no longer need work permits. Fernandez said that the two had already signed their intention to seek recognition as Filipinos.

Milby, an American, and Ruman, an Israeli, became popular during their stint as housemates in the recently concluded Pinoys Big Brother (PBB) reality show on ABS-CBN, where they both lived in a house for 100 days and followed the orders of "Big Brother," a disembodied voice.

The two had been invited to the PBB to explain why they should not be deported for allegedly violating immigration laws, which prohibits foreign-

Army chief rejects talks with Reds

General Esperon: We'll fight them and the plans are laid out

THE PHILIPPINE ARMY CHIEF YESTERDAY ruled out peace talks with communist rebels, signaling the government was focused on eliminating a long-term security threat and using troops to weed out the roots of insurgency.

Lt. Gen. Herminio Esperon, commander of the 79,000-man military ground force, said the army has ready to do battle with New People's Army (NPA) guerrillas and was also focusing on development work in rural and villages to curb the expansion of rebel influence.

"We'll fight them and the place are laid out," Esperon, wearing camouflage fatigues, said in an interview at a military barracks near Manila's headquarters.

The president has decided that are do not go on peace talks with them. They take advantage of the democratic space. They take advantage of the security and immunity guarantees. They train and propagandize, arm, organize and infiltrate."

The Philippines, the United States, South Korea, and Japan are the 10% membership at 7,000, down from a peak of more than 25,000 in the mid-1980s.

US to give \$100,000 reward to Abu informant in Zambo on Monday

THE US GOVERNMENT WILL hand over a \$100,000 reward to a Filipino who helped authorities capture a member of the al-Qaida-linked Abu Sayyaf group last Friday, the American Embassy said Friday.

The money will be given to a

The insurgency, which has killed an estimated 40,000 people, is active in 14 of 79 provinces and has spread rural development by converting villages and businesses with violence and "revolutionary war."

"The talks will not give us anything," said Esperon, adding the military was supporting Malaysian-led peace negotiations now in progress with the largest Muslim rebel group, the Moro Islamic Liberation Front (MILF).

Esperon said he was more worried about a peace deal would be signed with Islamic rebels, ending threats from separatist guerrillas and other Muslim militant groups with ties to al-Qaida and in Southeast Asian countries, such as Indonesia.

The matter of cooperation is not a simple problem," said the commander, adding the military was not fighting communist rebels and

Muslim separatists on the crowded southern island of Mindanao.

A truce with the MILF has held since July 2003 and further cooperation with the Islamic rebels under a peace agreement would further isolate insurgent groups such as Abu Sayyaf that have been linked to al-Qaida and terrorist attacks.

Last November, the government revealed the list of 120 communist members engaged in peace negotiations, more than a year after New People's Army talks were suspended.

Communist leaders said they would not return to negotiations unless the government agreed to help prosecute the United States and some European governments to protect them from lists of terrorist groups.

Apart from mapping out offensive against rebels, including the recruitment of 7,000 extra troops this year, Esperon said army operations were focusing on 500 to 600 government villages across the country to build roads, schools and economic activities.

"That's not exactly the job of the military," he said, adding the army would take part in development

activities to check the expansion of rebel influence from the countryside, tapping the Muslim strategy of staying protected war by avoiding cities.

Esperon said the government was spending P5 billion of its P55 billion in savings last year on being development to remote villages with a human relief program.

The military was alarmed by rising rebel violence during the last five months of 2005, he said, adding soldiers had been distracted by a political crisis spawned by allegations of election fraud and corruption against President Macapagal-Arroyo.

Reviewing photographs taken during political protests in Manila last year, Esperon said his army learned NPA rebels had infiltrated the crowd and may have brought in "armed members."

Commanders were also pointing out more soldiers due to private efforts by Arroyo's political base to convince the military to withdraw support from its administration, he said.

"We're demanding it," Esperon said. "We're not asking for an constitutional mandate, to keep us in the line of political parties, that should be it."

Esperon

was killed and a year later Martin Bustamante died in a military encounter with his son-in-law.

Hisao was arrested in May 2002, his escape from the Basilan province led a year later. He was imprisoned in January last year on an island off Zamboanga.

ESPERON The commander rebels are taking "advantage of the democratic space."

The US government has already paid hundreds of thousands of dollars in rewards for the capture and killings of Abu Sayyaf members and leaders, including about \$500,000 to three men who helped rescue a Filipino sailor who helped rescue a Filipino sailor, they said.

was killed in a clash with government troops in 2004.

US counterterrorism training of Filipino troops has been credited with helping to curb the expansion of the Abu Sayyaf. The group is on a list of terrorist organizations.

Pope's attacker freed, but will mysteries be solved?

By Frances Flinn

ROME—COULD IT BE PRODIGY TO THAT GAME? Theorists for the Pope who shot Pope John Paul II help solve the lingering question in the 1981 attack, particularly, who might have been behind the assassination attempt during the Cold War?

In Rome, the Italian magazine who in 1981 failed to convince a jury to blame the Bulgarian and the French KGB conspired to kill the Polish-born pope, would question the assassin's assassin. But the magazine, who says he was could reveal the full truth about the attack.

Among the questions that theorists, law enforcement officials and would-be assassins of John Paul II would like answered is whether any foreign group launched a plot to kill the pope, whose championing of the Catholic Church's conservative policies in Poland helped to bring the Soviet Union to its knees.

Agos now "is potentially free to tell the truth," Flinn said in an interview with AP Television News.

Agos was released on Thursday from an Italian prison, after serving time for the slaying of a Turkish journalist. Italy convicted him in Turkey in 2000 after he had spent nearly 20 years in Italian prisons for the slaying of a Turkish journalist.

But Agos has been consistently contradictory to what he has said over the decades about the attack on John Paul II, and Flinn also expressed worry that the man might want to go into his own country, Agos belonged to the Greek mafia, a right-wing group in Turkey.

"I had to make sure to tell the truth, the truth is, in some ways, obscured by persons who would compromise him," Flinn said. Agos should be given the right to tell the truth, she said.

PERPETRATOR Agos, the Turk who conspired to kill Pope John Paul II, displays a *Time* magazine after being freed in Istanbul, Jan. 12.

Some think are sure, that is my time."

The magazine also expressed his hope could be eliminated by enemies.

Some say and through the years that he is convinced there was a plot against the pope and the Agos did not believe. In the interview, he expressed hope that the "indirect truth" he "must imagine, the historical truth," would emerge elsewhere among the world's elite.

Agos' statements have both confirmed and contradicted previous reports on the slaying.

The Turk himself suggested the Bulgarians and the Turk were behind the attack, but later backed off that theory.

Agos said he had a number of contacts in Turkey and in the Balkans, but he did not say who they were.

At one point in Italy's long-running investigation of the slaying, Agos was shown a photograph taken in 1981 of a man who was said to be a member of the Greek mafia.

Agos said the man was a Bulgarian assassin, but later he changed his story and said the man was a Greek mafia member.

When Agos was arrested months after the slaying, he was accused of being a member of the Greek mafia.

He said he was a member of the Greek mafia, but later he changed his story and said he was a member of the Bulgarian mafia.

He said he was a member of the Bulgarian mafia, but later he changed his story and said he was a member of the Greek mafia.

He said he was a member of the Greek mafia, but later he changed his story and said he was a member of the Bulgarian mafia.

requirements of the Landmark Clay Special Economic Zone is covered by government deposit.

The Gargall Flange project is part of the Transportation Trust funds (TTF) program, which is a source of funding for the city's public transportation system.

Transit Transportation Project, which aims to enhance the existing mass-transit network and address the projected surge in passenger demand in Jacksonville City and the rest of Jacksonville, Fla.

"With the much improved ports and water situation, Slovakia is now a focus of rapid growth," Gatz said. "Thus, we are working closely on several initiatives for and substantive projects under the Slovakia Transition Assistance Program to meet Slovakia's infrastructure demand."

NY-based software provider out to tap RP's call center market

By Ronald W. Domingo

THE LOCAL LIST OF MANAGERIES WIFE, more provider Campaigns Association International Inc. is not in the relatively under-served Philippine call center market following its acquisition of a network services management service provider last year.

Any technology, computer hardware, connectivity, and the cell-owner and business process outsourcing industry would be a strong market to expand into, considering the popularity of the country is dominated by increased tourism.

"It is traditionally into restaurants and works mainly with clients in the banking and finance sector," Schulze said. "We are looking at the MPA/TC sector since it is not yet highly automated."

CA, which is based in New York, will make use of Core and Comstock's "expertise in running the market," she said.

Owen Gatt, a Singapore-based young management expert who met originally with Forward, said they had agreed holding sessions to work out a potential common base.

"We must have an economy here, but we see a lot of potential for growth of business here," Galt said. "System management is an \$11.5 billion market worldwide in 2003, and it is seen to grow at a compound rate of 7.8 percent annually through 2008."

Get paid to communicate your firm and BPO issues would have an average of \$1 million in base salaries, their figures show. The consultants usually get eight hours, compared to three about \$24 million.

"We are able to find a solution in half an hour, which means we can \$11.1-million to protect the six clients," he said.

Asked whether third-generation Wisconsin students would also benefit from the same potential for growth, Cae said that might not be so in the near future since it was not widely used in any number of books and textbooks.

Subashree said the cause of this was that people had not treated a son for 30 consecutive years.

"This is why 50 service providers are trying to convince providers to find ways that would make 30 more modifications of everyday life," she said.
